

Bridgestone develops its Tatabánya Factory by 85 billion Forint investment

The world's leading tyre and rubber product manufacturing company, with an investment worth 85 billion Forints, has **increased the size of its Tatabánya factory from 70,000 to 147,000 square meters, the number of its employees from 360 to 950 people and its production capacity from 1.8 million to 3.2 million tyres** and it aims to reach 7.2 million tyres by 2020. The development is not only significant for Bridgestone, but for the Hungarian economy as well. The extended plant carries out significant **R&D activity**, which has resulted that Bridgestone deployed high added value activities, as well as the development and production of DriveGuard, one of its most modern tyres to Hungary.
